## PROJECTS:

---

### Job Application Monitoring System (Capstone Website Project)

Developed a full-featured job application website to simplify the hiring process for jobseekers and admins.

- Implemented user authentication and profile management
- Enabled file uploads and real-time status notifications
- Built admin tools for job creation, user control, and application tracking
- Designed responsive layout for seamless experience across devices
- Integrated secure password hashing and session management for user data protection

### To-Do List Web App

Developed a simple yet functional to-do list application to manage daily tasks with real-time interactivity and intuitive UI.

- Implemented task creation, editing, and deletion with real-time updates.
- Connected to a database for secure and persistent data storage.
- Used PHP for handling database operations.

## INTERNSHIP:

---

GUTZ Online Communication Services

January 2025 – May 2025

- Designed and developed a responsive company website showcasing the services offered.
- Utilized HTML, CSS, JavaScript, and Bootstrap to create clean and user-friendly layouts.
- Collaborated with supervisors to ensure content and design aligned with company branding.
- Applied basic UI/UX principles to improve the site's readability and structure.
- Gained practical experience in front-end web development and working in a real-world setting.
- Troubleshooted and maintained system units
